Busy Bee Invoicing Review By: TreRIVE A customer Monday 29 September 2010 Summary: Busy Bee Invoicing is an easy to use and efficient solution for managing your finances, generating and printing invoices, quotes and payment reports. Simple, yet intuitive and user-friendly interface Although the application's graphic user interface seems primal and minimalistic, the functions it can process are quite complex and advanced. The layout of the utility is neatly organized for quick access to the important functions. Easily generate invoices and payments The application allows you to create a database of your customers, employees and items in

storage, so you can easily fill in the details in your invoices. You can choose customers or employees directly from the database via the dropdown menu, making the whole process of generating invoices a lot quicker. Once an invoice has been issued, you can also create a payment entry for it, which will change the status of the invoice to show it has been paid. Quickly create and manage a database of clients and employees With Busy Bee Invoicing, you can easily add customers, employees, jobs and even items in storage, in order to quickly select the data you need to input in your invoices directly from the database. Although not much information can be added about your clients, jobs or employees, the

application allows you to keep an organized database with the most essential contact details. Also, you can create a database with all your items in storage, for which you can specify their prices and the number of units available. Browsing through a large database of items, clients, jobs or customers can be tedious work, but that is where the advanced search function comes in extremely handy. Manage your finances in an organized fashion Busy Bee Invoicing proves to be a reliable and efficient solution for those who need to manage their financial aspect of their business, without having to be advanced connoisseurs of the computer technology. Features: Advantages Disadvantages One of the best invoicing program out there, which is so easy to use! I use this software for a long time and this is the only invoicing program I use and I have tried many others too. They are all nice and everything but this one has the most advantage over all of them. I b7e8fdf5c8
