created from 3D models with a variety of underground rooms and are the game's main content. Dungeons are randomly generated and their floors can contain various treasures, which makes it impossible to replicate the same dungeon the same way. Your party consists of four members; i.e., a Swordsman (DPS), a Priest (CC), a Rogue (Misc.) and a Summoner (Misc.). The RPG battle system is unique and features an unlimited number of turns. DPS and CC are formed into a party, and you will party with different guilds that have different battle styles, characters, skills, and various effects. You can select a party and equip the guild, weapons, armor and magic that they have equipped. You can also check the status of each character and their gear and further customize them by switching between items and slots. You can decide the skills of your characters, as well as their

starting levels, by checking the “Skills” and “Classes” buttons. Once your characters are completed, you can still customize them by using “crafts” on the “Equip” and “Character” buttons.

CLASSES ~~~~~~ Ninja / Summoner

Ninjas were once classless people who proved their strength by relying on speed, and they have skills such as Illusion and Time Control. Summoners are scholars who rely on magic, and their skills have an effect on the battlefield. Their Spells such as “Conjure Creature” allow you to summon monsters like “Shinobi.”

Geocaching

In the fifteen years that this hobby has been known, cartographers, geographers, and hobbyists have developed their own modalities. However, the easiest to understand and most widespread of these modalities is Geocaching. Geocaching is a new concept that has grown by leaps and bounds in recent years. In other words, for a country that was previously active in every hobby, the lively geocaching scene sprouted up after changes in the culture and technology. Geocaching is a sort of activity found at home, or around the world, around the clock and with the GPS.

Many people who have visited the World Heritage Site of Angamuiko Park, among others, have experienced the exhilaration and delight of finding activities outside while on vacation in the countryside. Launched worldwide in 2008, the phenomenon has become more widely-known thanks to the participation of a wide variety of communities in geocaching and is the first time that a nation has become so active in this hobby.
