History The AutoCAD family of software is the result of the merger of five Autodesk predecessor companies in 2000. Autodesk Inc. (Autodesk), the company that markets and develops AutoCAD, was founded in 1977 by John Walker. John Walker is a former president of Autodesk's predecessor firm, Golden Gate Systems. Autodesk had several other predecessors in its history. In 1981, a firm named Micro Systems was founded by John Walker and Ken Williams, who went on to found Synchronic Software and SolidWorks, respectively. In 1987, Autodesk acquired the small-business oriented Mechanical Solution group. In 1991, Autodesk acquired the company that manufactured the V-Carve CNC router, Carver. In 2000, Autodesk merged its Autocad product line, the C/C++ programming language with it, and the PDM product with its PC-based Construction Documentry software line. The M&M unit was sold in 2002. The firm also marketed the Autocad360 version of AutoCAD in 2002. The company's Studio product line was sold to Corel in 2002. Autodesk's earliest AutoCAD product was released in 1981, with the release of AutoCAD Architecture, an architecture drafting application designed for desktop use. when AutoCAD Activation Code ships with a drawing, it reads it into a database. This database contains the geometry of the drawing, along with the coordinates of objects that have been added to the drawing. With the release of AutoCAD 2011, version 2010 drawings can also be read into the database. This database is accessible from an external application. The database is a SQL Server database. The internal naming convention is AXDB_, where is the password used to access the database. The database is stored in C:\Program Files\Autodesk\AutoCAD\Data. The.NET framework is used by AutoCAD to update a drawing. This is done by retrieving a.NET assembly named "autocad" from C:\Program Files\Autodesk\AutoCAD\Application\, which contains methods for updating the database. This.NET assembly needs to be registered on the system. Autodesk.NET assemblies are distributed as a downloadable.NET application. They are installed by unpacking them into the Autodesk\Application directory. After installation they are stored in the same directory as the autocad application. They are distributed as two versions: the commercial version, Autodesk.AutoCAD.AutoCAD2011_Refresh.dll, or the free version, Autodesk.AutoCAD.AutoCAD2011_Refresh_Free.dll. The free version can be used for all AutoCAD 2011 products. Autodesk Exchange Apps are distributed as a.MSI,.EXE or as a ZIP package. Installation is done in the same way as the.NET assemblies. They are distributed as two versions: the commercial version, Autodesk.AutoCAD.AutoCAD2011_Refresh.msi, Autodesk.AutoCAD.AutoCAD2011_Refresh.exe, Autodesk.AutoCAD.AutoCAD2011_Refresh_Office.msi or Autodesk.AutoCAD.AutoCAD2011_Refresh_Office.exe, Autodesk.AutoCAD.AutoCAD2011_Refresh_OpenSource.zip or Autodesk.AutoCAD.AutoCAD2011_Refresh_OpenSource.msi, Autodesk.AutoCAD.AutoCAD2011_Refresh_OpenSource.exe, Autodesk.AutoCAD.AutoCAD2011_Ref af5dca3d97
